EDUCATION

Bachelors of Computer Science

Gyalpozhing College
of Information Technology

2022 - 2026

Yangchenphug
Higher Secondary School

Class 11-12
2018 - 2020

LANGUAGES

Nepali
Native proficiency

Dzongkha
Fluent – spoken and written

English
Fluent – professional working

Hindi
Conversational proficiency

PROFILE

Detail-oriented and results-driven Computer Science student specializing in Artificial Intelligence, Machine Learning, and Cybersecurity. Experienced in developing AI-driven applications, implementing deep learning models, and simulating real-world cybersecurity vulnerabilities. Strong foundation in system design, API integration, and full-stack development with a focus on building scalable and efficient solutions. Seeking opportunities to apply technical expertise in real-world environments and contribute to innovative projects.

EXPERIENCE

Enki Realm Creatives – Lead UI/UX Designer & Frontend Developer

Enki-Realm Creatives | 2023 - Present

Tshongkang (Hatil Bhutan)

- Led UX/UI design and frontend development

Nubyul Law Agency

- Managed frontend development and design strategy
- Collaborated with stakeholders to align design with business goals

RMD Center – Visual Designer

November - December 2025

- Designed promotional posters and visuals for an RMD Center tournament

GCIT Start-Up Agency – Developer

December 2023

Ministry of Energy & Natural Resources

- Tourism Company Web development

Destiny Bhutan

- Tourism Company Web development

SLSI Bhutan

September 2022

Open World Mapping project for rural bhutan

Logo competition Winner

LEADERSHIP ROLES

Literary and Interactive Club (LIA)

President & Vice President

2022 Autumn Semester - 2026 Spring Semester

Team Lead / Project Manager

EcoVision - Year End Project 2025

GCIT Chatbot - Capstone Project 2026

UI/UX Lead & Graphics Designer

COP28 Bhutan - Year End Project 2025

EcoVision - Capstone Project 2026

GCIT Chatbot - Capstone Project 2026

Hatil Bhutan - Capstone Project 2026

PROJECT

POYO - Pocket Yoga, AI-Powered Yoga App

Frontend Developer, UI/UX Designer

- Best Project Award – PRJ301, Gyalpozhing College of Information Technology (GCIT), 6th Semester, 2024
- An AI-powered yoga app that evaluates users' poses in real time, providing feedback and points to enhance practice accuracy and engagement using computer vision and machine learning.

EcoVision - AI-Powered Plastic Bottle recycling Application

Team Lead, Frontend Developer, UI/UX Designer, IOT Technician

- Developed an AI-powered IoT bottle recycling application that automatically detects and grades recycled bottles, rewarding users with points to promote sustainable behavior. Combined machine learning, sensors, and gamification for a real-world impact project.

COP28 Bhutan – Digital Entry Platform

Frontend Developer, UI/UX Designer

- Designed and developed a user-centric digital platform for Bhutan's COP28 participation under the Ministry of Energy and Natural Resources, showcasing climate initiatives and sustainability efforts. Focused on intuitive design, accessibility, and responsive user experience for global audiences.

Tshongkhang (Hatil Bhutan)

Frontend Developer, UI/UX Designer

- Designed and developed an e-commerce website for Hatil Bhutan, enabling seamless browsing and purchasing of furniture products with a user-friendly and responsive interface.

Cybersecurity Project

Citrix Bleed (CVE-2023-4966) Simulation

Cybersecurity Analyst, Penetration Tester, Simulation Developer

- Simulated the Citrix Bleed (CVE-2023-4966) vulnerability using a Flask-based mock server, with a completed Docker setup and progression to a full VMware-based environment involving Kali Linux, Citrix NetScaler ADC, and Windows 10. Included traffic capture and exploitation workflow.

Machine Learning Project

Rainfall Prediction Web App

Machine Learning Developer, Backend & Frontend Developer

- Developed an ML-based rainfall prediction web application using Flask, featuring a user-friendly interface, prediction system, history tracking, and clean navigation with a responsive design.

Capstone Project

GCIT AI Chatbot

Project Manager, AI Engineer, Full-Stack Developer

- Developing an AI-powered chatbot for GCIT to enhance student and administrative convenience using Retrieval-Augmented Generation (RAG). The system enables context-aware responses by integrating institutional data, aiming to improve access to academic and campus-related information through an intelligent conversational interface.

SKILLS

Technical Skills

Machine Learning, Computer Vision, TensorFlow, OpenCV, Frontend Development

Design & Creative Skills

UI/UX Design, Visual Design, Wire-framing & Prototyping, Branding and Poster Designs

Soft Skills

Problem Solving, Analytical Thinking, Team Collaboration, Project Management

Tools & Platforms

Git & GitHub, Jupyter Notebook, Linux / Kali Linux, Docker, VMware, Figma, Adobe Illustrator

CERTIFICATIONS

Foundations of UX Design

Start the UX Design Process: Empathize, Define, and Ideate

Build Wireframes and Low-Fidelity Prototypes

Conduct UX Research and Test Early Concepts

Create High-Fidelity Designs and Prototypes in Figma

Build Dynamic User Interfaces (UI) for Websites

Design a User Experience for Social Good & Prepare for Jobs

AWS Certification
