EDUCATION

Bachelors of Computer Science

Gyalpozhing College of Information Technology

Royal University of Bhutan

2022 - 2026

High School

Yangchenphug Higher Secondary School

Class 11-12

2018 - 2020

SKILLS

Technical Skills

Machine Learning, Computer Vision, TensorFlow, OpenCV, Frontend Development

Design & Creative Skills

UI/UX Design, Visual Design, Wire-framing & Prototyping, Branding and Poster Designs

Soft Skills

Problem Solving, Analytical Thinking, Team Collaboration, Project Management

Tools & Platforms

Git & GitHub, Jupyter Notebook, Linux / Kali Linux, Docker, VMware, Figma, Adobe Illustrator

AI & Machine Learning Engineer | Computer Vision |
Cybersecurity Enthusiast

PROFILE

Detail-oriented and results-driven Computer Science student specializing in Artificial Intelligence, Machine Learning, and Cybersecurity. Experienced in developing AI-driven applications, implementing deep learning models, and simulating real-world cybersecurity vulnerabilities. Strong foundation in system design, API integration, and full-stack development with a focus on building scalable and efficient solutions. Seeking opportunities to apply technical expertise in real-world environments and contribute to innovative projects.

EXPERIENCE

Enki Realm Creatives – Frontend Developer & Lead UI/UX Designer

Enki-Realm Creatives | 2023 - Present

Tshongkang (Hatil Bhutan)

- Led UX/UI design and frontend development
- Improved user experience with responsive layouts
- Coordinated with team for timely, high-quality delivery

Nubyul Law Agency

- Managed frontend development and design strategy
- Implemented modern UX/UI principles for better usability
- Collaborated with stakeholders to align design with business goals

RMD Center – Visual Designer

- Designed promotional posters and visuals for an RMD Center tournament
- Created marketing materials to increase visibility and engagement for the center
- Ensured all designs were visually appealing, consistent with the center's brand identity
- Collaborated with team members to conceptualize creative ideas and campaigns

PROJECT

POYO - Pocket Yoga, AI-Powered Yoga App

Frontend Developer, UI/UX Designer

- Best Project Award – PRJ301, Gyalpozhing College of Information Technology (GCIT), 6th Semester, 2024
- An AI-powered yoga app that evaluates users' poses in real time, providing feedback and points to enhance practice accuracy and engagement using computer vision and machine learning.

EcoVision - AI-Powered Plastic Bottle recycling Application

Team Lead, Frontend Developer, UI/UX Designer, IOT Technician

- Developed an AI-powered IoT bottle recycling application that automatically detects and grades recycled bottles, rewarding users with points to promote sustainable behavior. Combined machine learning, sensors, and gamification for a real-world impact project.
